The LE1600 featuring a 12.1" display and Intel Centrino Mobile Technology gives you exceptional mobile performance and productivity.

Get Moving with Motion's Latest Innovation

the LE1600 Tablet PC

Your business day moves faster and farther than ever before. That's why we've designed the new LE1600 Tablet PC – providing you with the most advanced mobile computing technologies available today. This thin and ultra-mobile Tablet PC moves beyond the expected with Intel® Centrino™ Mobile Technology and integrated high-speed wireless connectivity. Offering a sleek design, the ultimate in wireless productivity and state-of-the-art security, it's pure innovation right in your hands.

The LE1600, the latest addition to Motion's award-winning Tablet PC series, is a true breakthrough in optimizing the balance between high-end performance, battery life and a lightweight, sleek design. Motion's recognized track record for innovation and history of prestigious industry awards assures you that our newest ink-enabled Tablet PC is everything you've imagined. Plus, we create tailored solutions for your particular business, whether you're in healthcare, field sales and service, government or education.

Dynamic Design

If you want mobility without compromise, the LE1600 lets you experience ultimate freedom of movement while maximizing your Tablet PC capabilities. Work seamlessly in all environments using our innovative Convertible Keyboard. Not only does it double as a snap-on travel keyboard

and docking solution, it provides you with a charging station and USB connectivity – all in a single, compact accessory. Back at the office, simply drop the Tablet PC into our full-featured FlexDock docking station for a complete desktop computing experience.

For up to a full day of power, our slim Extended Battery attaches neatly to the back of the LE1600, offering optimum balance of battery power and weight¹. Custom-configure your Tablet PC for specific battery life needs each day with our flexible dual-battery design. Need even more power? The Motion Battery Charger can charge both the Standard Battery and the slim Extended Battery at the same time. Yes, we've thought of everything.

The LE1600 is the most user-focused Tablet PC design available today. You'll simply consider it the answer to your every mobile computing need.

Remarkable Innovation

Thanks to Motion's visionary approach to understanding mobile computing requirements, the best slate Tablet PC just got better. The LE1600 integrates the latest innovations in ultra-mobile technology with the optimum balance between high performance and a lightweight, purely flexible Tablet PC.

We've created the LE1600 to provide all the advanced connectivity and expansion features you might need now or in the future. Our optimal bundle of features lets you easily connect to a broad range of peripherals with reduced cable management hassles. Embedded Wi-Fi lets you enjoy safe, high-speed wireless computing from anywhere. And our new Digital Video Interface port (DVI-D) provides remarkable image quality when you connect to external displays and projectors.

The LE1600 is equipped with the latest display technologies – whatever your viewing needs, we've got you covered. The 12.1" screen is just the right size for convenient viewing of documents, forms, presentations and multimedia content. Collaboration with co-workers and dynamic presentations are a breeze with our wide viewing angle screen. And Motion's own View Anywhere® technology is the perfect solution for working outdoors or in any lighting situation, ensuring optimum screen viewing wherever business takes you.

Powerful Productivity

As your work style changes and grows, look to Motion to deliver the ultimate in wireless productivity. The LE1600 offers you true anywhere, anytime computing. First we deliver up to a full day of battery life with our new lightweight, hot-swappable, slim Extended Battery¹. Discover the utmost in productivity with our comprehensive package of wireless technologies. Enjoy untethered support for GPS receivers, keyboards, cell phones and more with integrated Bluetooth® technology. The latest Intel mobile processors and newest chipset in the LE1600 propel you to a faster performance realm than ever before. And the latest memory technologies deliver performance you won't soon forget.

Motion's Speak Anywhere™ technology is yet another innovative feature. The unique design intelligently switches between two of our three microphones (based on screen orientation) to provide optimum, beam-focused voice recordings, while our configurable acoustics software cancels out what you don't want to hear. Now you can dictate notes, interview clients and communicate on the run, even in noisy locations.

Plus, you and your IT department can count on maximum uptime due to the advanced product durability and reliability we design into each system. With the LE1600, you get the performance you demand.

Enterprise-Class Security

At Motion Computing®, we have a strong commitment to ensure out-of-the-box, safe computing for each and every user. The LE1600 offers the latest security advancements to protect you today and into the future. We've designed the Motion Security Center to allow you to easily and quickly configure just the right level of protection to meet your individual security needs.

Rest assured that your data will be safely protected by our new embedded Trusted Platform Module (TPM), which enables hardware-based encryption, offering much higher security than software solutions alone. To prevent unauthorized use, our integrated Fingerprint Reader protects you by offering an additional level of authentication unmatched by passwords alone. And if you're looking to add even more control in high-security environments, you can easily disable both the 802.11 and Bluetooth connections when necessary. We've made sure that you can keep your sensitive data, network resources and assets secure.

If you're looking to take your mobile computing experience to new levels, look no further than the LE1600 Tablet PC. Its remarkable features, revolutionary design and unmatched performance are sure to keep you and your business moving forward. Remember, if you can imagine it, we can create it.

LE-Series Accessories

Maximize your LE1600 Tablet PC capabilities.

The grab-and-go **FlexDock** docking station, when combined with either the **Wireless Keyboard** or the **USB Keyboard** (inset), seamlessly converts the LE1600 into a robust desktop system. Expand your usability by adding the **USB DVD/CD-RW** drive or your favorite accessories².

For traveling without limitations, Motion's unique **Convertible Keyboard's** cable-less design is easy to setup and stow away². The snap-on combination keyboard and docking solution provides power to your LE1600 and USB accessories. It can also act as a charging station for your Tablet PC and Extended Battery. Shown with the **USB Modem**.

Flexible Dual-Battery Design

Reliable power for your working day.

Custom-configure your LE1600 Tablet PC for your specific battery life needs with our flexible dual-battery design. The warm-swappable **Standard Battery** will provide several hours of reliable power. For up to a full day of power, easily attach our slim, hot-swappable **Extended Battery** to the back of the LE1600¹.

Quickly charge two Standard Batteries or one Standard Battery and one Extended Battery simultaneously using the dual **Battery Charger**².

Cases & Portfolios

For users on the go, let Motion provide the perfect companion for your LE1600 Tablet PC and accessories.

With the detachable saddle bag, the **Field Case** is designed for users who require a rugged carrying case solution. With the unique easel design, you can instantly create a mobile desktop. Keep your LE1600 Tablet PC smudge-free with Motion's **Display Cloth** (inset).

The **Bump Case** provides additional protection for your LE1600 when traveling or in the field. For added mobility and flexibility, it includes an X-hand strap on the back of the case for support while walking or standing.

For the professional on the go, the **Executive Portfolio** provides a convenient and stylish way to carry and protect your LE1600 Tablet PC and accessories.

Designed specifically for the LE1600 Tablet PC and accessories, the **Compact Case** is ideal for users who prefer to carry a single case that can hold all of their work materials.

Advanced Capabilities

Extend your connectivity and productivity.

The Tablet PC digitizer **Pen** with eraser tip provides increased comfort with its sleek, new design.

Motion's optional memory upgrades include **256MB, 512MB or 1GB DDR2 400MHz RAM**. Choose the right amount of memory for your mobile computing needs.

For ultimate clarity and resolution, use the **DVI-D Display Cable** to connect your LE1600 Tablet PC to external DVI monitors and projectors.

The **Auto/Plane Adapter** plugs into most standard 12-volt automobile or airplane power ports. Operate your LE1600 and charge your battery at the same time.

A second **AC Power Pak** provides the convenience of working from multiple locations.

With the **Motion Accessory Cable**, connect to your DVD/CD-RW drive while on the go and leverage the power of your LE1600 battery.

Motion LE1600tc Tablet Client

The Motion LE1600tc Tablet Client combines the mobility of a slate tablet computer with the reliability of an embedded operating system to create a wireless mobile thin client computer. It addresses an emerging demand for organizations requiring high data security, networked data access, centrally managed administration, high system reliability and an ultra mobile wireless platform with pen input.

Based on Windows® XP Embedded, the LE1600tc features a familiar Windows XP desktop while enabling wireless access to server-based applications. Most Windows XP applications will run on the LE1600tc just as they do on a standard PC - no re-engineering is required. It includes a built-in web browser, Citrix® ICA client and Microsoft RDP client. An onscreen keyboard and ink tools make data entry possible while standing or walking. Contact us for additional information.

Motion Computing Services

Motion Computing offers industry-leading, flexible service and support programs that enable you to acquire, protect and service your Motion Tablet PCs from purchase through deployment. We offer MotionGuard® by Safeware® as a comprehensive insurance protection plan designed to safeguard your Tablet PC investment. It covers most repairs or even replaces your Motion Tablet PC and accessories caused by many kinds of losses.

Motion Computing Financial Services offers specialized leasing programs. Our team of finance professionals is ready to assist you with every step of the financing process. Plus, Motion warranties let you feel confident in your investment.

Take advantage of our standard 1-year, 2-year or 3-year limited warranty on Motion Tablet PCs. All Motion Computing accessories are also protected by a separate standard, limited warranty.

About Motion Computing

Motion Computing produces slate Tablet PCs for mobile professionals in targeted industries including healthcare, field sales and service, government and education. Motion is a mobile computing and wireless communications leader, combining world-class innovation and industry experience so individuals can use computing technology in new ways and places. Marketed worldwide through a reseller network and directly through our web site, each Motion product is built to customer specifications. Motion's enhanced line of Tablet PCs and accessories are designed to increase productivity for on-the-go users while providing security, power and versatility.
